Summary

Software Engineer 1 at Deloitte with experience building ReactJS UI features, integrating RESTful APIs, and supporting cloud operations. Hands-on with C#, .NET Core, Azure Functions, AWS, Docker, and AI-assisted software delivery.

Education

CMR College of Engineering & Technology 2020–2024
B.Tech, CSE (AI & ML) *CGPA: 8.56*

Narayana Junior College 2018–2020
Intermediate *93.5%*

Brilliant Grammar High School 2018
High School *CGPA: 9.8*

Skills

Languages / Frameworks: ReactJS, C#, .NET Core (MVC), SQL, YAML, C++, Python.

Tools & Platforms: Git/GitHub, AWS, Docker, Kubernetes, Copilot, Claude, Dynatrace, Terraform.

Experience

Deloitte Hyderabad, India
Software Engineer 1 *2024–Present*

- Developed and maintained responsive ReactJS pages, optimizing state management and client-side data fetching to improve user experience across complex workflows.
- Implemented robust REST API integrations with centralized error handling, standardized responses, defensive parsing, and graceful UI fallbacks to reduce user-facing failures.
- Developed efficient .NET Azure Functions and RESTful endpoints to streamline application processes, automate workflows, and improve service reliability.
- Applied Copilot and Claude to improve developer productivity and delivery efficiency.
- Supported consistent builds, deployments, and runtime configuration with Docker and AWS; used IAM, EC2, CloudWatch, and VPC to support cloud application operations.
- Coordinated deployments, cutovers, and post-release validation across environments with platform and security stakeholders, including network configuration and secure API access controls.
- Maintained 95% site uptime during peak traffic through health checks, monitoring, and centralized logging.
- Supported onboarding and induction of new hires, helping them ramp up quickly and align with team processes.

Certifications and Achievements

AWS Certified Cloud Practitioner (CLF-C02) | Certificate

Demonstrated understanding of core AWS services, cloud architecture, shared responsibility, security best practices, pricing, and cloud economics.

Claude Certified Associate | Certificate

Demonstrated understanding of Claude AI, generative AI, prompt engineering, responsible AI, and effective use of Claude for productivity and problem-solving.

Google Data Analytics Professional Certificate | Certificate

Completed six-month job-ready training with hands-on experience in data cleaning, data visualization, and project management.
