SUMMARY

Software Engineer 1 at Deloitte with experience building ReactJS UI features and integrating RESTful API's, plus cloud operations exposure. Hands-on with C#, .NET Core, and Azure Functions, and experience using AI tools and agentic AI workflows to support software delivery.

EDUCATION

CMR College Of Engineering & Technology <i>B.Tech- CSE(AI&ML)</i>	2020 - 2024 CGPA: 8.56
Narayana Junior College <i>Intermediate</i>	2018 - 2020 Percentage: 93.5%
Brilliant Grammar High School <i>High School</i>	2018 CGPA: 9.8

SKILLS

Languages: ReactJS, C#, .NET Core(MVC), SQL, YAML, C++, Python.

Tools & Libraries: Git/GitHub, AWS, Docker, Kubernetes, Copilot, Claude, Dynatrace, Terraform.

EXPERIENCE

Deloitte <i>Software Engineer 1</i>	Hyderabad, India 2024 - current
- Developed and maintained multiple responsive web pages using ReactJS, contributing to an enhanced and consistent user experience. - Implemented robust API integration patterns centralized error handling, standardized responses, defensive parsing, and graceful UI fallbacks to reduce user-facing failures. - Implemented scalable React state management and client-side data-fetch optimization to ensure predictable UI behavior and improve responsiveness across complex screens and workflows. - Developed efficient and scalable Azure Functions with .NET to streamline project processes. - Wrote fully functional code for Azure Functions, focusing on performance and reliability. - Designed RESTful endpoints to integrate application components and automate workflows. - Worked with AI coding assistants such as Copilot and Claude in software development, staying aligned with emerging trends and using AI tools to improve productivity and development efficiency. - Worked with AWS environments and Docker to support consistent builds, deployments and runtime configuration. - Worked with AWS cloud services, including IAM, EC2, CloudWatch, and VPC, to monitor and manage cloud-based applications. - Led deployments and release readiness across environments, coordinating cut-overs and post-release validation to ensure stability while aligning with platform and security stakeholders on network configuration and access controls for secure API access. - Maintained 95% site up-time during peak-traffic windows through continuous monitoring, automated health checks, and centralized logging.	

CERTIFICATIONS AND ACHIEVEMENTS

AWS Certified Cloud Practitioner (CLF-C02)

Demonstrated a strong understanding of core AWS services, cloud architecture, shared responsibility model, security best practices, pricing models, and cloud economics.

Google/Data Analytics Professional Certificate | Certificate

Completed extensive six month job-ready Google Career Certificate training. Demonstrated hands-on experience with data cleaning, data visualization and Project management.

Certificate of AI-ML Internship | Certificate

Successfully completed 10 weeks AI-ML virtual internship by AICTE supported by AWS academy
